

Figuring Semester Grade for Computer Applications

1st Quarter

Grade: A %: 102.5

$$\underline{102.5} \times \underline{.40} = \underline{41}$$

2nd Quarter

Grade: A %: 103.3

$$\underline{103.3} \times \underline{.40} = \underline{42.353}$$

83.353

Semester Test

$$60 \cdot 20 = 12 + 83.353$$

If you score a

60%	95.35 A
70%	97.35 A
80%	99.35 A
90%	101.35 A
100%	103.35 A
